

# Sample PDF for Assignment

## Introduction

This is a sample PDF file created for testing purposes. It includes multiple pages of text to simulate a realistic document. The content is meant to be used for extracting and querying text using a FastAPI application.

## Page 2

Here is some additional content to ensure that the PDF file has multiple pages. This text will be used to test the PDF text extraction and querying functionality. The PDF file should be long enough to test the chunking logic in the FastAPI application.

## Page 3

Finally, this is the content for the third page. The document is designed to test various aspects of PDF handling, including text extraction, chunking, and question answering. The text content should be varied to provide comprehensive testing.
